

ANIL SEZGİN

Senior AOSP & BSP Developer

anil.sezgin@outlook.com · anilsezgin.dev · linkedin.com/in/anilsezgin · Ankara, Turkey

SUMMARY

Senior software engineer with 13+ years of experience in consumer electronics, defense industry, and automotive. Expert in Embedded Android (AOSP), Board Support Package (BSP) development, and QNX. Proven track record in leading platform-level software development across smartphones, tablets, defense systems, and next-generation automotive infotainment platforms.

EXPERIENCE

Lead Software Developer HaleyTek AB — BSP

May 2023 — Present
Göteborg, Sverige

- Lead Software Developer Nov 2024 — Present
- Senior Software Developer May 2023 — Oct 2024

- › Board bring-up of Volvo Cars IVI systems on Qualcomm SA8155 and SA8255 SoCs.
- › Integration of Qualcomm baselines and AOSP/AAOS uplifts from Google manifests.
- › Python automation framework for baseline integrations and AOSP uplifts, with unit and integration tests.
- › Boot time optimizations on QNX Hypervisor and Android VM.
- › Debugging platform-level issues across QNX Hypervisor and Android VM.
- › Secureboot enablement and automation framework development.
- › Extended QDL (Qualcomm open-source downloader) for CI/CD and developer workflows.
- › Virtual A/B and dynamic partitions adaptation for software download processes.
- › Incremental OTA implementation for software download processes.

Senior Software Engineer Aptiv — Advanced Safety / UX

Nov 2021 — Apr 2023
Kraków, Polska

- › Development and maintenance of software download applications using Android's Update Engine.
- › Adaptation of Android OTA package creation to customer-specific software download format.
- › Debugging platform-level issues on both QNX and Android Virtual Machine.

Senior Researcher

TÜBİTAK SAGE — Embedded Systems

Oct 2019 — Sep 2021
Ankara, Turkey

- › Extension and development of ExoPlayer library for real-time video streaming.
- › Development of video player applications using GStreamer SDK, H.264 over RTP/RTSP.
- › Embedded Linux development using Yocto for i.MX 8 based custom HMI boards.

Software Architect

Vestel Electronics — Mobile Devices

Dec 2013 — Sep 2019
Manisa, Turkey

- Software Architect Dec 2017 — Sep 2019
- Sr. Software Design Specialist Jan 2015 — Dec 2017
- Software Design Specialist Jan 2014 — Dec 2014
- Software Design Engineer Dec 2013

- › Led architectural decisions for Android OS customization on Qualcomm-based smartphones and tablets.
- › Design, development and integration of system services for manufacturing and OTA updates.
- › Android OS bring-up on custom boards based on Qualcomm chipsets.
- › Peripheral bring-ups of display (MIPI-DSI), audio, sensors (I2C, SPI) on Linux Kernel.
- › BSP-level development and integration for tablet and smartphone product lines.

EDUCATION

M.S. in Computer Engineering 2017 — 2019 Özyeğin University

B.S. in Electrical & Electronics Eng. 2008 — 2013 Middle East Technical University

AREAS OF EXPERTISE

Embedded Android (AOSP) BSP Development
Linux Device Drivers QNX Hypervisor

PROGRAMMING

C++ 98/11/14/17 C Python 3.x Java Shell
Makefile CMake

TOOLS & PLATFORMS

Android Studio Git Gerrit Claude GDB
ADB Repo Tool VS Code

LANGUAGES

Turkish — Native
English — Fluent Swedish — Beginner

HONORS

65th among 1,600,000 2008
Univ. Entrance Exam (ÖSS)

PROJECTS

- › Android Automotive Platform — IVI (BSP & AAOS)
- › OTA Update System — Aptiv
- › Real-Time Video Streaming — TÜBİTAK
- › Vestel Venus V3 5570 — Smartphone (BSP & AOSP)
- › THOR Tablet Series — Multiple variants
